

PLANT DESIGNS PRESERVED

Plant Designs foundations are rooted in an extensive knowledge of plants and horticulture.

We're happier when surrounded by nature, from our stress levels decreasing through to productivity and focus rising, there are so many good things that can come from plants.

We know living plants aren't always the correct option for your space, whether this is due to low light levels, decreased airflow or reduced access for maintenance.

With our range of preserved plants and moss designs, no matter the environment, your space can be transformed into a haven of greenery with a multitude of benefits. Whether you're after one of our standard designs or something created bespoke for you, we're on hand to find the perfect fit for your space.

WHAT ARE PRESERVED PLANTS?

Preserved plants are 100% natural indoor plants that require no typical plant maintenance, soil, or sunlight.

Suitable for indoor use only, our preserved range features a variety of planting styles so you're guaranteed to find something that works for you, from moss walls and panels through to leafy potted plants and decorative pieces.

100% Natural

All preserved plants are completely natural and hand picked for the preservation process.

No Maintenance

No watering or pruning required.

Acoustic Properties

Natural acoustic qualities to reduce sound travel within busy spaces.

Non Toxic

Created with completely natural products, allergen free and does not attract insects.

Plant Growth

Plants are grown naturally and cared for until they reach the desired size and appearance.

Preserving Solution

The plants are picked and added into an eco-friendly preserving solution which replaces the sap in the plant.

Drying

Once the absorption process is complete, the plants are left to dry. They are then tidied and pruned so they look their best.

Design

The preserved plants arrive at our studio where our team handcraft our range of designs.

WHAT IS THE PROCESS?

In order to preserve plants, their natural sap must be replaced by a solution that allows them to retain their looks and freshness for years to come.

The process is non-toxic and eco-friendly and carried out by plant preservation experts before arriving at the Plant Designs Studio.

MOSS WALLS

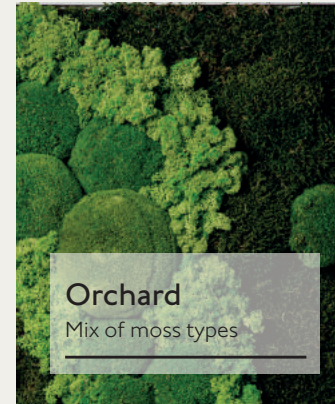

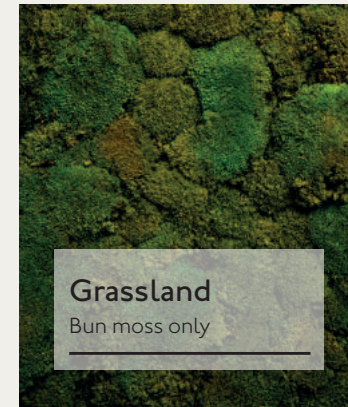

From simple designs that add a pop of colour through to designs bursting with detail, our moss walls are guaranteed to transform your space and are custom made to whatever size suits you.

MOSS DESIGN STYLES

We've got a range of moss design styles to choose from so you can be sure to find something that suits your interior.

Created expertly in-house using a variety of preserved moss and foliage species, our moss designs can be catered to you, all you need to do is let us know your ideas and the level of detail you would like from our range .

Our moss design styles can be applied to both moss walls and moss frames. Please note that this range depicts the levels of detail we offer, designs can be catered towards your ideas.

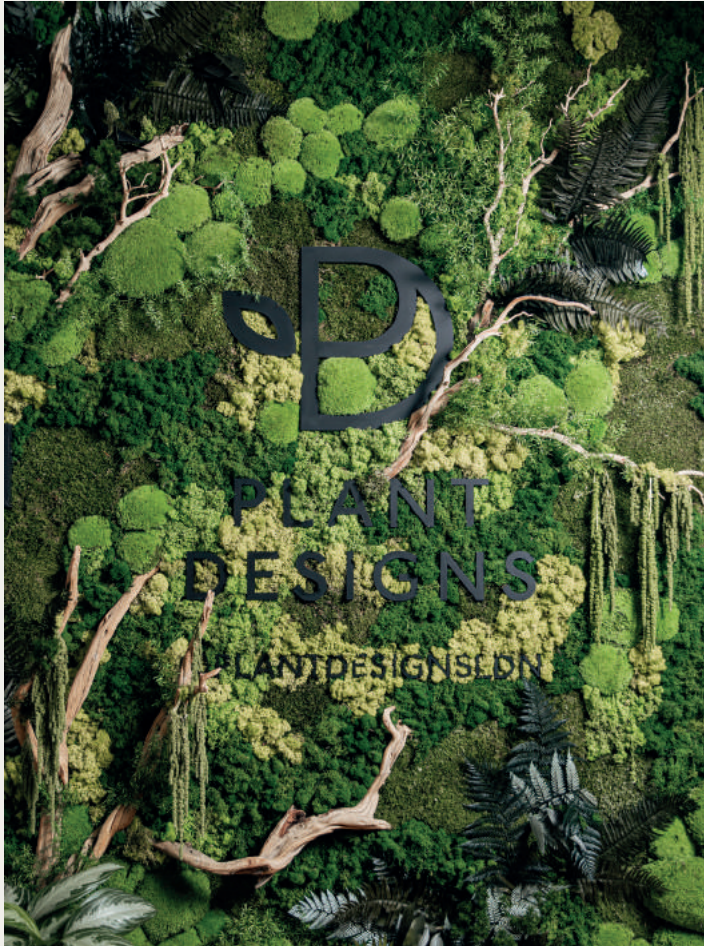

MOSS FRAMES

Available in a range of shapes and sizes, moss frames are the perfect way to add unique biophilic works of art into your interior design.

BESPOKE

For when you're after something unique to your space, our bespoke preserved designs are the way to go. Designed and custom made by our in-house team to suit your exact needs, the possibilities are endless so get in touch to discuss your ideas.

KOKEDAMA

If potted plants aren't your thing, or you're just after something a little bit different, opt for one of our preserved Kokedamas. Perfect for hanging displays or adding some greenery to shelving.

TOPPERS

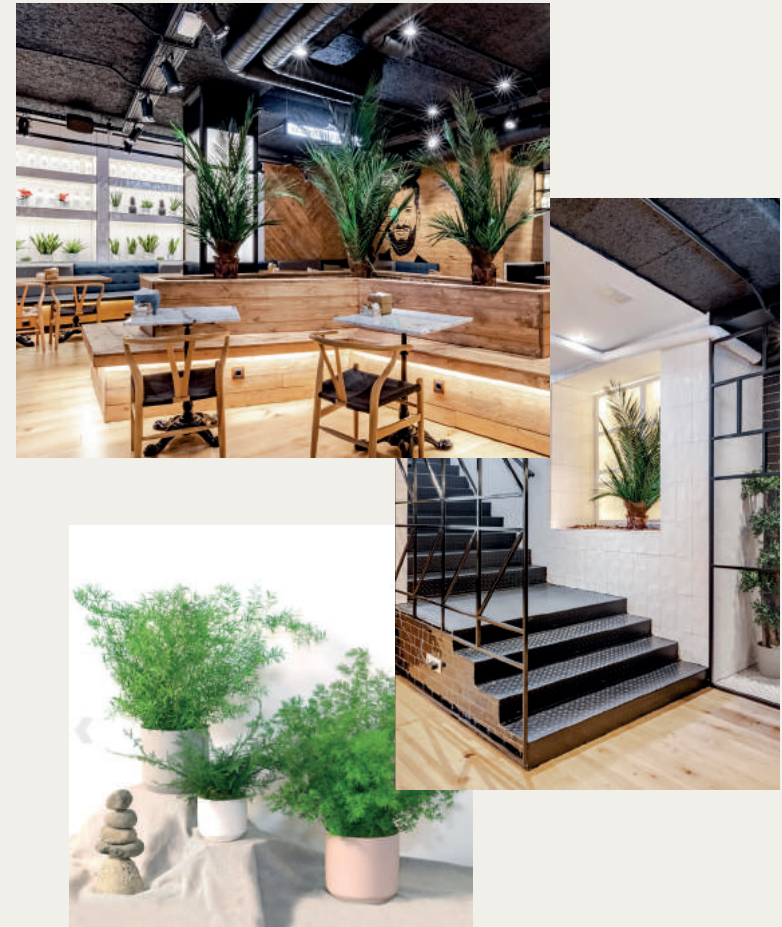

Designed to go atop cabinets, units and shelves, our preserved toppers come in a range of sizes or can be created bespoke for the perfect fit. Ideal for adding green details or natural dividers to interiors.

PLANTS & TREES

*Large scale trees to be ordered bespoke

With the same freshness and appearance as live greenery, preserved plants and trees add nature to a space without the added need for regular maintenance or natural light, making them the perfect addition no matter the environment.

HOW IT WORKS

With a team of multi-talented designers, dedicated installers and of course horticultural experts, we are specialised in bringing moss and preserved plants to interiors.

Whatever you have in mind, Plant Designs are on hand to take the project from the initial design stages all the way through to installation of your new greenery.

Get in touch to discuss your ideas and brief

We'll help you decide which products are best for you, whether that's a standard design or something created bespoke

Our designs are produced in-house by our talented preserved team

We'll deliver and install your designs so you don't have to worry about a thing
