

# BLOOM

BY PLANT DESIGNS

## HOW DOES BLOOM WORK?

It's pretty simple, Bloom is our subscription service offering beautiful flowering plants for your space, delivered on a regular schedule, either monthly or quarterly.

Once you choose your range and size requirements, our talented team will create a handmade display, using plants that are at their peak at that time of year.

Ordering your Bloom subscription is easy:

1. Choose your range
2. Choose the size of your display
3. Choose your plants & colours

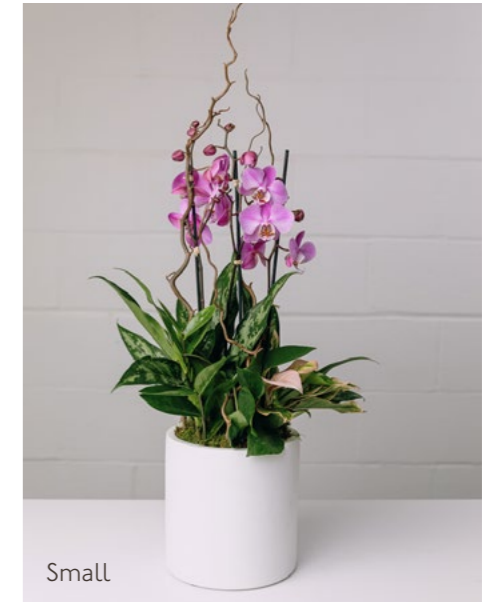

And that's all there is to it! Of course, if at any stage you wish to change your display options or add in something larger to mark an occasion, your client manager is on-hand to help.

It's time to Bloom.

RANGE  
**JUNGLE**

Luscious, leafy, our 'Jungle' range is evocative of a tropical rainforest. Made with beautiful orchids or vibrant tropical bromeliads, along with mixed foliage to create a lush display. You can select the size of your arrangement, which flowering plants you'd like and our talented team will do the rest.

Large

Small

'Jungle' displays feature sculptural blooms and luscious underplanting in a rich range of shapes and textures that mirror those found on the rainforest floor. This range comes in small, medium and large and can focus on either orchids or flowering bromeliads. Also available in a larger statement size with orchids only.

Statement

RANGE  
**GREENHOUSE**

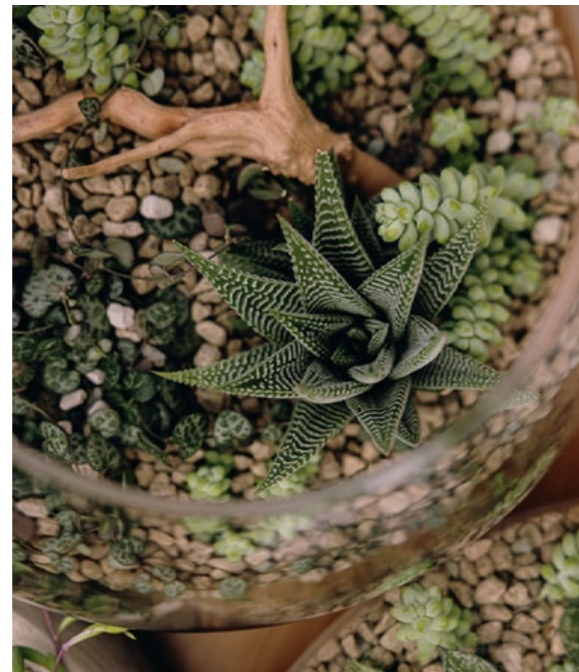

For a more minimal look, our 'Greenhouse' range is the perfect choice. With sculptural stems and a more limited colour palette, it is guaranteed to bring an air of elegance to any space. Just decide on the size of your arrangement, the type of plants and our talented team will get to work. This range comes in small, medium, large and can focus on orchids or flowering bromeliads.

RANGE

# TERRARIUMS

Playfully sophisticated, our terrariums are miniature biomes contained in a glass fishbowl. This range features small succulent planting, creating miniature landscapes. Available in small, medium or large sizes, they can be changed quarterly due to the nature of the plants.

RANGE  
**CONNECT**

For those board room meetings and coffee table chats, we understand that plants (as wonderful as they are) can sometimes get in the way. Our 'Connect' range is designed to work around this, with low planting and bowls that won't impede any face-to-face contact. All planted in low bowl containers, range of planting and colours are available and no display is more than 45cm tall.

# SEASONAL

VALENTNES

SPRING

SUMMER

AUTUMN

HALLOWEEN

CHRISTMAS

We can offer a range of displays to mark occasions through the year. From Spring to Winter, you can celebrate with a fresh living display. We can deliver to celebrate each season, specisl events and additional displays for events like Valentine's Day or spooky season.

All seasonal Bloom displays come in three sizes, small, medium and large. They all incorporate beautiful design details and fresh blooms, at different scales to best fit your space.

You can choose from four seasonal changes a year included in your rotation. Four displays help mark the seasons each quarter or we can design you bespoke displays for other occasions, like Valentine's Day, Halloween or any in-house events you want to make more colourful.

# SCALE UP

We can offer larger scale displays that take key seasons to a whole new level. Make your reception desk a real focal point for guests, creating a rich autumn tablescape, lush spring meadow or let us help bring bespoke events to life. No matter what the season or celebration, we can make something that will stand out.

# INTERACTIVE

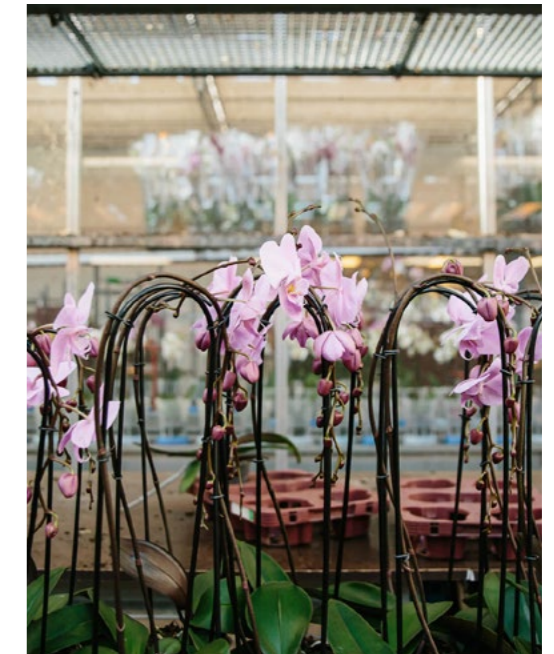

Want to get people involved? We can also build larger scale interactive displays, to encourage people to stop, sit or take photos, so they feel part of the celebration. Talk to us about your ideas and we can help you bring it to life and take your event to the next level.

## HANDMADE & DELIVERED

Bloom displays are handmade and hand delivered by our talented team. They are made in-house, delivered with care to your building by our friendly installations crew then cared for onsite by trained horticulturalists.

Our displays are a cost effective alternative to cut flower deliveries as they last for a month or more rather than a week. This also means they are gentler on the planet, creating less waste and less deliveries. All plants are re-homed or composted when your display is changed over.

## OUR SERVICES

We offer a full range of horticultural services to clients across London.
